

THE CONTACTLESS OFFICE

POWERING CHICAGO TO A BETTER WORKPLACE FOR ALL

With offices across Chicagoland reopening in a COVID-19 world, Powering Chicago contractors have the skilled, trained union electricians and expertise to install contactless technologies to power a safer workplace for all.

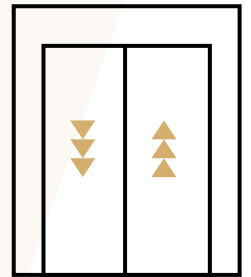

CONTACTLESS ACCESS POINTS

Digital sign-in kiosks for guests and contactless ID badge-readers limit the transmission of germs through hand-to-hand contact without sacrificing security.

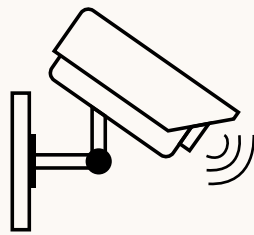

TOUCH-FREE ELEVATOR CONTROLS

Leading-edge technologies that make use of holograms, invisible sensor fields or fobs that don't require contact are a forward-thinking solution.

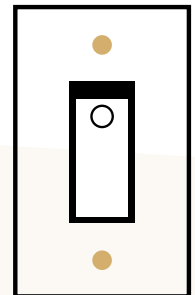

THERMAL SCREENING SYSTEM

Capable of scanning the body temperature of up to 30 people per second and highly accurate, a thermal screening system creates a contactless first line of defense.

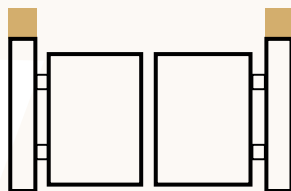

MOTION-ACTIVATED LIGHTS

Installing motion-activated lights or hands-free switches eliminates a common touchpoint in many workplaces.

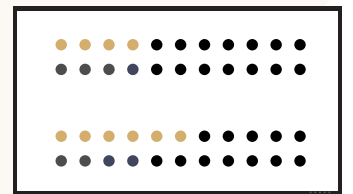

AUTOMATIC DOORS

Many newer buildings already make use of automatic doors. But for older offices, retrofitting automatic doors throughout the workplace is a straight-forward project with the potential for big impact.

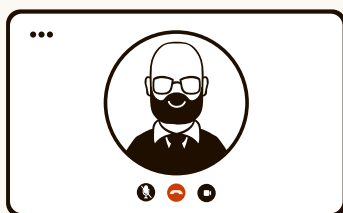

MONITORS

To promote social distancing in the office, monitors that display real-time information about areas to avoid can be installed in almost any location.

AV SOLUTIONS

Professional-grade cameras and audio systems that can be controlled with users' cellphones create dedicated spaces for virtual meetings.

TOUCH-FREE BATHROOMS

Partnering with skilled union plumbers, Powering Chicago members can ensure that no bathroom surface needs to be touched after installing automatic faucets, toilets, hand dryers and doors.
